

2.4GHz RFIC

Short-range radio transceiver

Very small size: 4mm X 4mm

Low-power: Four power-saving operating states

Exceptional RX sensitivity: -95 to -90 dBm

High communications reliability: GFSK with FHSS capability

High data rates: Up to 1 Mb/s

Wide range of applications

The small size, low power consumption, and superior receiver sensitivity of the TRC104 make it ideal for a wide variety of short-range radio applications:

Automotive

- Automobile immobilizers
- Auto entertainment systems
- Two-way remote keyless entry

- Communications systems in motorcycle helmets

Building Automation and Control Commercial and Residential

- Lighting control
- Thermostats

- Remote entry access

Communications

- Wireless modules

- Data communications

Computer Peripherals

- Wireless keyboards
- Wireless mouse devices
- Wireless joysticks

- Wireless printers
- Wireless copiers
- Wireless audio

Consumer Electronics

- Wireless game controllers
- Wireless headsets
- Wireless audio
- Wireless advanced toys

- Wireless leisure equipment
- Wireless sports and performance monitoring

Industrial/Manufacturing

- RFID readers
- Active RFID tags
- Industrial sensors

- Low-power two-way telemetry systems
- Asset and personnel tracking

Medical

- Insulin pumps
- Asset and personnel tracking

- RFID readers
- Active RFID tags

Retail

- RFID readers
- Active RFID tags

- Low-power two-way telemetry systems

Security/Theft Prevention Residential, Commercial and Construction

- Door/window sensor intrusion systems
- Motion detectors

- Smoke/fire detector and alarm systems
- Security cameras

**ROHS Compliant
FCC & ETSI Certifiable**

Ideal for low-cost, high volume, two-way short-range wireless applications operating in the worldwide unlicensed 2.4 GHz ISM Band

Single-chip Multi-Channel Low-power Small size

- GFSK with Frequency Hopping Spread Spectrum capability
- High Sensitivity: -95 dBm @ 250 kb/s and -90 dBm @ 1 Mb/s
- High Data Rate: Up to 1 Mb/s
- Low current consumption:
- Receive current: 18 mA - Transmit current: 13 mA @ 0 dBm
- Up to 1 mW transmit power
- Wide operating supply voltage: 1.9 to 3.6 V
- Low sleep current: 0.4 μ A

Easy design-in

All critical RF and base-band functions are Integrated In the TRC104, minimizing external component count and simplifying design-in. Only a microcontroller, crystal and several passive components are needed to create a complete, robust radio function.

- Integrated PLL, IF and base-band circuitry
- Low-cost crystal reference
- Integrated RSSI
- Integrated crystal oscillator
- Integrated 16-bit packet CRC
- Integrated DC-balanced data scrambling
- Integrated voltage regulators
- Four power-saving operating states
- Integrated data & clock recovery
- Programmable RF output power
- Transmit/receive FIFO, 32 Byte
- Programmable TX/RX FIFO depth
- Continuous & protocol modes
- Packet destination and sender addressing
- Packet handling features:
- Packet address filtering
- Error detection
- SPI configuration & data interface
- TTL/CMOS compatible I/O pins
- Host microcontroller interrupt outputs
- Programmable data rate
- Small plastic package: 24-pin QFN (4mmX4mm)
- Standard 13 inch reel, 3K pieces

Long battery life

Includes a set of low-power states to reduce overall current consumption and extend battery life.

Fast-track your design -- order a Developer Kit today!

- Over-the-air data rate GFSK communication up to 1 Mb/s
- 57.6 kb/s serial PC communication
- Reference antennas
- Data terminal program
- Complete DR board configuration through RFDA 4.0 software
- TX/RX diagnostic LEDs for visual verification
- Packet checksum verification
- Range test: default packet or up to 128 byte custom packet
- Application firmware development

DR-TRC1-4-2400-DK contains:

- Two DR-TRC104 development boards
- Two USB 2.0 cables
- Two 2xAA battery packs
- Four AA batteries
- Two 9V batteries
- Two antennas with standard SMA connector
- Program CD
- Two universal power supplies

How To Buy

Murata products are sold through a world-wide network of sales reps and distributors. Go to the Murata website at www.murata.com and visit the "Products - Wireless Connectivity Platforms" section to locate a sales/distribution partner near you.
